

The Lemoine Company
Vibrant Signage for Construction Company

The Lemoine Company

Headquartered in Lafayette, Louisiana, The Lemoine Company is a one of the largest general contracting and construction management companies in the South.

In 2019, The Lemoine Company officially moved their headquarters into a building designed by Chenevert Architects that they had constructed - providing 27,500 square feet of space for the business to grow. This new facility has an industrial design with features such as floor to ceiling windows and exposed ceilings that create an open, modern ambiance within the space.

Having worked together on a multitude of projects in the past, ASI New Orleans has a longstanding relationship with The Lemoine Company and was thrilled to be brought on during this important transition into their new facility.

Service Offerings

- Consultation
- Design
- Fabrication
- Installation

Product Applications

- ASI LPP Series Laser Cut Acrylic
- ASI LF Series Face-Lit Channel Letters
- Dual-Colored Film
- Push-Thru Acrylic Illuminated Monument

About the Solution

ASI consulted with The Lemoine Company on their needs and vision. ASI's LF Series Face-Lit Channel Letters were mounted to the exterior of the building with the "built to last" letters in Dual-Colored Film, which appears white at night and black during the day to increase visibility. Push-Thru Acrylic graphics were utilized to create the illuminated Monument Sign.

Inside of the facility, there is an ASI LPP Series Laser Cut Acrylic logo with 1/4" thick letters applied to 3/8" acrylic to add dimension. Since the logo was mounted to glass, a black backer cut to outline the shape of the logo and individual letters was added.

Today, The Lemoine Company has custom signage crafted to showcase their brand and effortlessly integrate with their modern headquarters.
