

Photopolymer ADA-Ready™ Signage

InTouch™ is a single-piece photopolymer, ADA-Ready™ signage solution available for both interior and exterior usage. InTouch is ideal for solutions that require a wide range of colors, profiles and raised details. The tactile lettering and Grade II Braille are integral to the surface of the sign.

- Interior-rated standard
- Exterior-rated option available (one-piece construction with topcoat)
- Intricate graphic detail
- Durable matte topcoat resists cleaning agents and vandalism
- Wide range of colors available for text, graphics and backgrounds
- Aluminum substrate and glow in the dark photo luminescent substrates available

Standard Features and Options

- Photopolymer thickness options: 0.125", 0.375", 0.5"
- Background appearance options: 140 standard colors, custom colors available, second surface graphics available, matte non-glare face finish.
- Back panel options: Same size as face, applied to oversized, backplate materials.
- Installation options: Wall or partition mount.
- One year limited warranty
Note: InTouch™ plaques may be integrated with other products such as decorative accent bars and frames, WindowSigns™, and interior modular systems such as Infinity™, Modular Signage System.

Wall Mounted Panels

- Photopolymer face bonded on rigid backplate
- Clear photopolymer for subsurface graphics
- Tactile lettering, graphics and Grade II Braille are integral to the face material
